Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: The inventor and attorney discussed the concept of the invention. A discussion of the cited prior art of Ehlers and Budike took place and the inventor and attorney explained the invention compared to the cited prior art. The specific limitations of claims 1 and 2 believed to overcome the prior art were discussed, mostly relating to the verification of rate change by the utility. Examiner indicated he will discuss the case with his supervisor. The attorney asked the examiner to call him if further amendments or discussion would advance the prosecution of the case.
